Turf Maintenance

Question and Answer Addendum – September 29, 2022

1. **Question:** I have a question about 3.2 Scope of Services/Product. The scope indicated monthly power groomings and sweeping off of all fields. Is this for the high school sports season months March – November for a total of 9 monthly groomings or do you plan to have this service performed each of the 12 calendar months? In the months December – February the field may be snow covered or frozen preventing such groomings. If you could please specify the number of months that would be helpful.

Answer: At this point we are looking for 12 months. We have a Kubota with the appropriate blade to clear the snow and plan on clearing the fields so they can be used.
